Comments
(Set forth by above question #, if applicable.
Use "Additional Comments" Sheet, if needed)

File #: 95-260296		
#1: With microscopic hair comparison, even with the best	notes, there is no way to determine	ne the comparison
was performed correctly. The fibers were examined appro	priately.	
#2: The examination results set forth in the laboratory rep	ort are supported by the bench no	tes, but the
documentation is marginally adequate. The notes are not	dated or initialed and are in pencil	. RQ uses
abbreviations to indicate the microscopic characteristics of	of the hair. These abbreviations are	difficult to interpret.
The technician's notes do not document that hair were rec	covered from Q43 or Q45.	÷.
